(619) 260-4506  
Applications due Dec. 15, 2014!

**THINK LIKE A CHANGEMAKER**

University of San Diego
THINKERS, RESEARCHERS, CHANGEMAKERS

RESEARCH OPPORTUNITIES
At USD, you'll have the opportunity to partner with your professors, conduct original research of your own, present your work and review projects done by students from all academic disciplines.

HONORS PROGRAM
If you're looking for a rigorous and rewarding academic experience, look no further than the USD Honors Program, which is designed to help students with extraordinary scholastic ability reach their full potential.

FIRST-YEAR EXPERIENCE
To make your transition to Torero life as smooth as possible, we’ve developed the First-Year Experience program. We'll help you connect with fellow students and faculty through our Preceptorial Program, and our themed Living Learning Communities will provide you with the opportunity to form lasting relationships with classmates.

RESIDENTIAL LIFE
Residential Life plays a vital role in the USD experience, so we require that students live on campus for their first and second years. First-year students live in themed residence halls, while second-year students live in on-campus apartments. We want our students to be engaged both inside and outside the classroom, involved in our many organizations and events and connected to their peers and professors. By living on campus, students are immersed in the Torero community and are but a short walk from the resources they need to be successful. Also, studies have shown that students living on campus perform higher academically.

SMALL CLASS SIZES
With an average class size of 22 students, you’re not just another face in a crowded lecture hall. Classes are interactive, with interactive discussions led by professors who know your name and are fully invested in your success.

Since its founding in 1949, USD has been committed to an education that combines Catholic intellectual tradition with the liberal arts. Our Core Curriculum will teach you to think critically and innovatively while becoming an ethical and engaged global citizen. You will connect with the world outside the classroom through the research opportunities, service-learning experiences and study abroad programs that are integrated into our academic framework. You will realize your full potential as a Changemaker with the help of dedicated faculty. In the end, you won’t just learn about the world — you’ll learn how to change it.

ENIRONMENTAL AND OCEAN SCIENCES Professor Michel Boudrias crams all the bad news about climate change into the first five minutes of his course — then spends the rest of the semester helping students figure out how to be part of the solution.

“Thatsis his mission. He helps them see that, regardless of their major, they can do their part.”

“These students are deeply engaged,” Boudrias says. “They’re making a difference here and in developing nations around the world.”

LEARNING IN AND OUT OF THE CLASSROOM
SERVICE-LEARNING
You can make a difference, and we’ll help you find a project or activity that kindles your lifelong spirit of giving.

STUDY ABROAD PROGRAM
You’ll have the opportunity to connect with people and places that exist beyond our borders. Our study abroad program is consistently ranked among the top 3 in the nation for undergraduate participation, and offers a selection of more than 80 academic programs in over 35 countries around the globe.

“The city was rich in culture and identity. Just being there taught me about how we are all connected as a global community. It really builds off the idea of the ‘bigger picture.’ Finding your role in a global society and how you fit into it is the fun part.”

TRENT SAIGET
YEAR: Junior
MAJOR: Communication Studies
MINORS: Leadership Studies and Psychology
STUDY ABROAD: Second Year Experience – Florence, Italy (Winter 2014)
