

## Using CastAway With the Barix InStreamer

Castaway is a homegrown application at USD that allows lecture and class audio to be captured in rooms equipped with BarixInstreamer and a microphone.

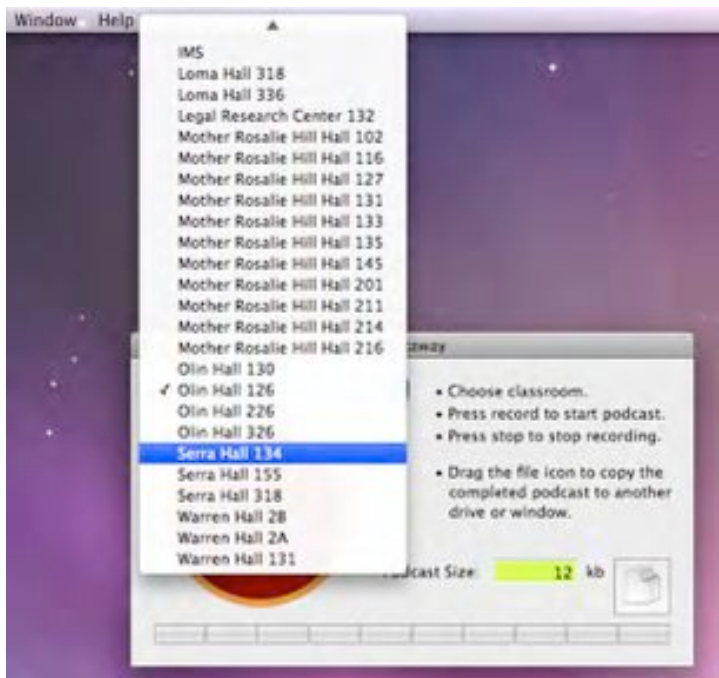

**NOTE:** To avoid disappointment, it is **HIGHLY** recommended that you do a test first to ensure the equipment is functioning *before* recording your entire lecture.

1. Make sure that the classroom computer is set on the **Mac** side.
2. Double click on the program icon.

3. The program will open and you should then select the room that you are in.

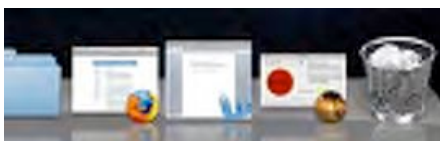

Select your room

4. To begin recording your lecture, click Record. You will know that you are recording by the increased file size window.

File Size Window

You can minimize the program

5. When your lecture is finished, click Stop

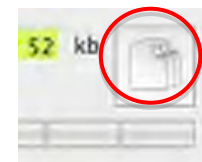

Notice the file has automatically saved on your desktop

been

6. At this point you may:

- Drag the file on the desktop to portable USB storage device
- Drag the file icon on the program itself to portable USB storage device
- Upload the file directly from the classroom computer to the USD podcasting server (provided you have already requested and account | Request an account: [jerry@sandiego.edu](mailto:jerry@sandiego.edu))
- The upload url for the podcasting server is: <http://catcher.sandiego.edu/files>
- Upload the file directly from the classroom computer to your CE6 course
