

Patron Suggestion

September 28, 2004

Why are the lights in the study carrels constantly missing or burned out? Shouldn't they be all checked at least weekly?

–Quickly Becoming Mr. Magoo

LRC Response

October 4, 2004

I am glad that you brought this to my attention. I did not realize that it is still a problem. We will increase our patrols of carrel lighting to two rounds per week. Our goal will be a working light in every carrel at all times.
