

Patron Suggestion

I suggest providing a box of latex gloves near the rare books section to prevent acid from hands from hands from further decay of books. Thank you!

LRC Response

June 2, 2006

Thank you for your concern for the preservation of these materials. In response to your excellent suggestion, we will post signs by the rare books collection asking patrons to get gloves from the circulation desk before handling the materials. When possible, staff members will accompany patrons seeking these materials to assist them in handling them properly.
