

Information Series

LRC Laptop Computer Access

The University of San Diego does not require students to have a laptop computer. However the Legal Research Center does have data outlets and wireless transmitters allowing laptop access to the Internet, USD e-mail, and SALLY (USD's library catalog).

All carrels in the LRC have active data outlets marked "data". The carrels also have a hole in the desk for the patron to insert a security cable. Please ask at the Reference Desk, Circulation Desk, or Electronic Services Office if you are interested in locating a data outlet.

Wireless access is available throughout the LRC.

Please call the LRC Electronic Services Department at 619-260-4759 if you have questions.
