Role: Collaborator with Dr. James Bolender (PI) and international colleagues.
Amount Requested: \$3,300,000. **Status:** Submitted, not funded.

RESEARCH EXPERIENCE:

2017-2018 **Project:** *The Microbiome as a Potential Mediator of Socio-Economic Disparities in Preterm Infant Neurodevelopmental Trajectories, from NICU Discharge to School Age (ECHO)*. Kim, J. Principal Investigator. **Funding Agency:** NIH Environmental Influences on Child Health Outcomes (ECHO) Program
Role: Co-Investigator. Administer standardized neurodevelopmental and motor testing. Developed guidelines for research visits.
Description: Multisite longitudinal study of preterm infants to explore factors, particularly in the microbiome, that may be modifiable to optimize neurodevelopmental outcomes. Two epochs including neonatal intensive care unit (birth to discharge) and home environment from discharge until school entry. Comprehensive battery of neurodevelopmental tests,

questionnaires, and collection of biological specimens. Annual spatial geo-mapping of environment of home address.

2017-present

Project: *Premature Infants Receiving Milking or Delayed Cord Clamping: Randomized Controlled Multicenter Non-inferiority Trial: PREMOD-2*. Katheria, A. Principal Investigator

Funding: Eunice Kennedy Shriver National Institute of Child and Human Development through Sharp Memorial Hospital. **Role:** USD PI, performed gold standard video-taped developmental assessment (Bayley Scales of Infant Development-III) and neurologic exam. Video used for training participants at other sites. Assisted in developing clinical research forms. Responsible for certifying examiners at other sites. Perform assessments on subjects unable to be seen in clinical sites. Develop protocol for use of Ages and Stages 3rd Edition.

Description: Multi-site, international trial investigating short and long-term outcomes of preterm infants receiving either umbilical cord milking or delayed cord clamping.

2013-2018

Project: *Neural Basis of emerging math difficulties in healthy preterm children* Akshoomoff, N. Principal Investigator

Funding Agency: Eunice Kennedy Shriver National Institute of Child and Human Development.

Role: Collaborator. Recruitment of preterm subjects, perform standardized neurological assessments, administer the “Movement Assessment Battery for Children-2”. Review of medical records and develop description of the preterm population.

Description: Longitudinal study of healthy preterm infants with matched term controls at starting at kindergarten entry. Measures include neurocognitive testing, behavioral testing, neurological exam, brain MRI and review of medical records.

2010-2016

Project: *School age follow-up of the SUPPORT Neuroimaging and Neurodevelopmental outcomes study, a secondary study to the Surfactant Positive Airway Pressure and Pulse Oximetry Trial (SUPPORT)*. Vaucher, Y. Principal Investigator.

Funding Agency: Eunice Kennedy Shriver National Institute of Child and Human Development.

Role: Gold standard reviewer for the Movement Assessment Battery for Children-2 (MABC-2) and neurologic exam, reviewing and providing feedback for other sites to certify examiners. Follow-up coordinator for UC San Diego site, tracking and enrolling subjects, performing standardized neurologic exams,

administering MABC-2, and administering a battery of parent questionnaires.

Description: Longitudinal, multi-site trial of outcomes of very preterm infants enrolled in the SUPPORT trial who had both brain MRI and head ultrasound prior to discharge from the NICU. Very comprehensive battery of neurodevelopmental and movement testing, neurologic exam, and growth to determine outcome and predictive ability of brain MRI vs. head ultrasound. Secondary trials included collection of specimens to assess adrenal function and measurement of skin fold thickness and blood pressure to determine incidence of obesity and hypertension.

2007-2008

Project: *Extended follow-up of subjects enrolled in the whole body cooling trial for neonatal hypoxic ischemic encephalopathy of the Neonatal Research Network.* Vaucher, Y. Principal Investigator.

Funding Agency: Eunice Kennedy Shriver National Institute of Child and Human Development.

Role: Follow-up coordinator, site gold standard examiner for neurologic exam. Tracked and enrolled subjects, performed neurologic assessments and administered standardized questionnaires.

Description: Multi-site longitudinal follow-up study of term infants enrolled in a trial of whole body cooling for treatment of neonatal hypoxic ischemic encephalopathy. Comprehensive battery of neurobehavioral assessments.

2001-2006

Project: *Multicenter network of neonatal intensive care units.* Finer, N. Principal Investigator

Funding Agency: Eunice Kennedy Shriver National Institute of Child and Human Development.

Role: Follow-up Coordinator. Enrolling and tracking preterm infants in study of outcomes. Performed standardized research assessments. Site Gold Standard administrator of Bayley Scales of Infant Development II and III and neurologic exams. Longitudinal follow-up of subjects in trial of Glutamine supplementation.

Description: Multi-center research network of neonatal intensive care units performing multiple clinical trials in the neonatal population.
