

UPDATING ID VIA EXTERIOR SALTO LOCKS

Instead of having to visit the Campus Card office, you may now update your SALTO access by holding your ID card against one of the exterior door SALTO locks. This will only work on EXTERIOR locks and not locks that are located inside buildings.

It is important that you try to update your ID card only on locks that look like the one below:

They can be found all around campus on the outer perimeter of buildings.

Instructions:

1. Take your ID card and place it against the Salto lock, once you do that you will see a blue light flash quickly.
2. After the blue light stops flashing, there will be a green light that flashes 2x on the Salto lock which is to indicate that your card has been updated.

If there are any problems, please do not hesitate to reach out to Campus Card Services or visit the office in UC 127: campuscard@sandiego.edu
