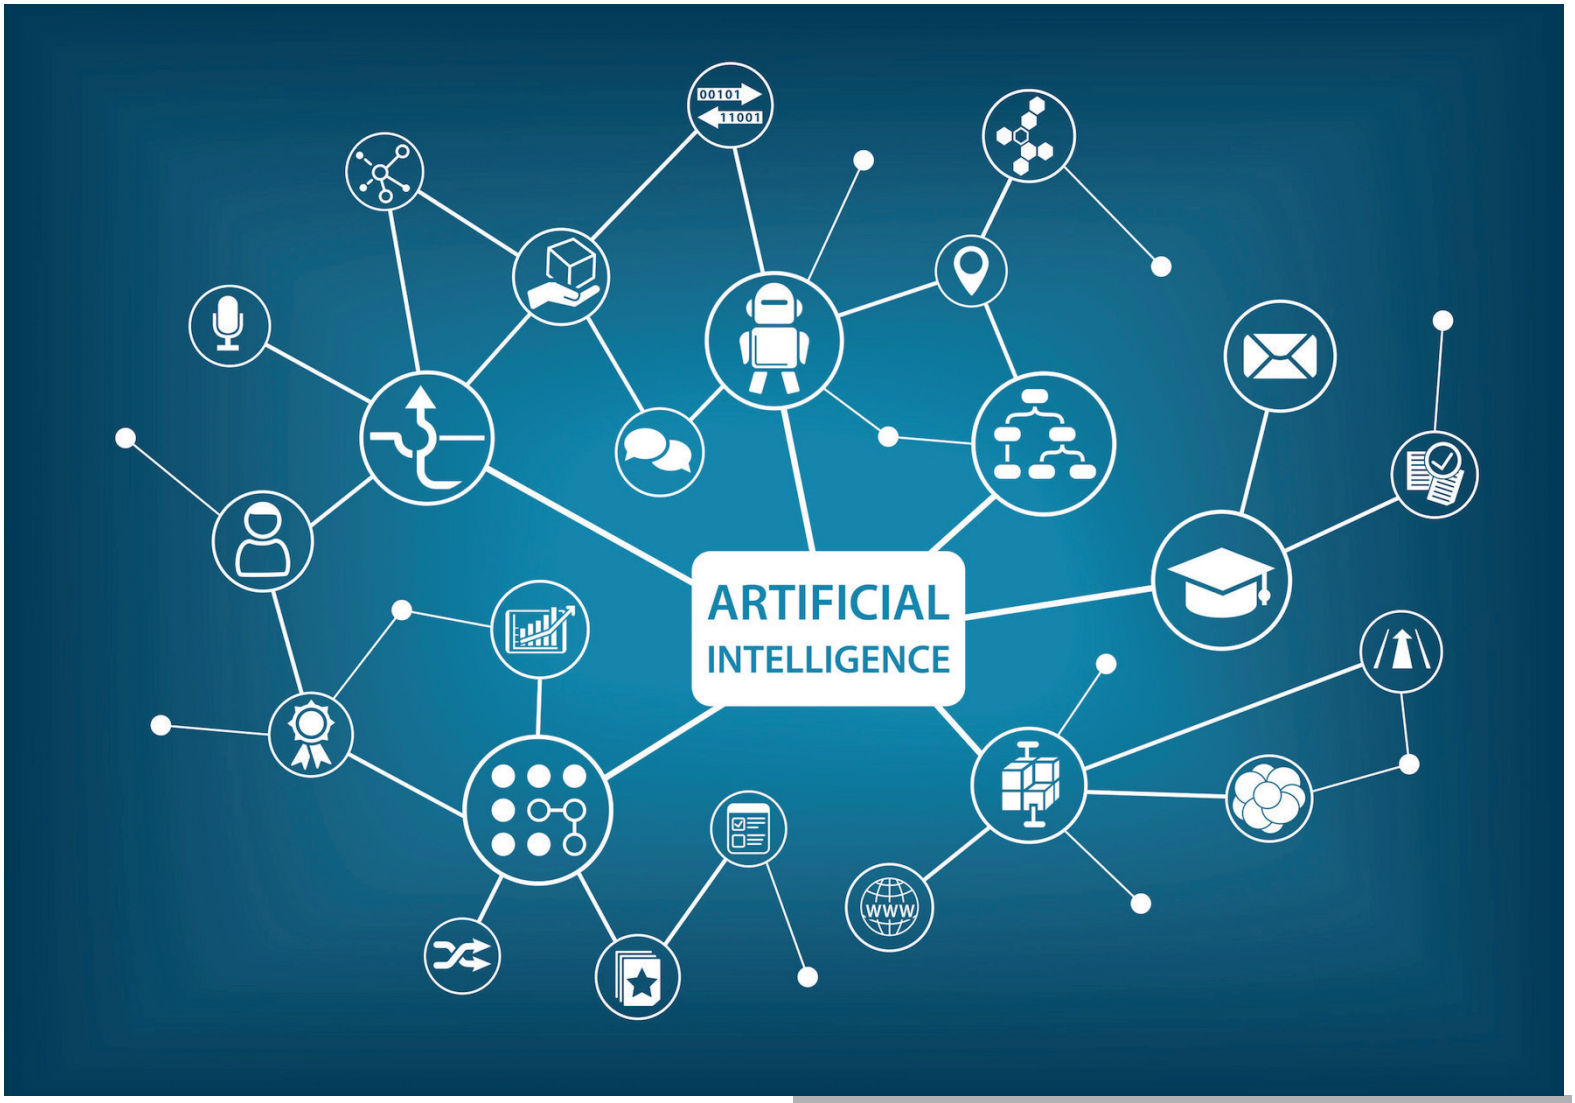
CRITICAL AI LITERACY

Spring 2024 Seminar (HUMC 394-04)



This two-day workshop offers an overview of the historical foundations of AI and philosophical reflection on it and a chance to experiment with and reflect on the implications of generative AI tools such as ChatGPT. We will discuss the urgent need for critical AI literacy in a world in which powerful new AI systems are introduced and deployed in the absence of developed regulatory and ethical frameworks. We will experiment with AI tools and discuss their real and potential implications for society, the environment, and humanity. The aim of this workshop is to both offer basic practical skills in using AI while honing critical thinking about the ethics of the deployment and use of AI systems.

Attendance and participation for the full two days of the workshop. This is a hands-on workshop that will involve experimentation with tools, discussion, reflection, and creative work.

Spring 2024 Workshop: HUMC 394

Dates:	Saturdays at 9 a.m.– 4 p.m. February 17 and March 2
