

# George Gardner

---

Class of 2019

**Current Profession:** Business Analyst in the Operations Department at NBC Universal in Denver, Colorado

**Previous Math-related Profession:** Mathematics Tutor for the USD Athletics Department

**Advice:** “Make sure to supplement your Mathematics studies with additional technical skills such as learning different coding languages especially Python. Additionally, don't just focus on understanding the concepts and examples you learn in class, but develop the skills to communicate these concepts to a group that may not have the same technical capabilities as you. One of the most sought-after skills in the workforce is the ability to effectively communicate highly complex concepts in simple terms while maintaining integrity.”

**Current Hobbies:** Playing golf, hiking, furthering technical skills through online courses and personal research

**Other:** George is considering post-graduate education in Data Science after a few years of working in industry
