

Erin (Williams) Lopez

Current Profession:

Medical Science Liaison

Graduate School:

PhD in Biomedical Sciences (double major in Mathematics and Biology)

Class of
2013

Advice:

- “Go to office hours for each of your professors (1) it will help dividends with the work and (2) all of the math professors are great mentors, they want you to succeed/will give you great advice
- Take cryptography if it is offered during your 4 years (Dr. Hoffoss taught my class and it was SO much fun!)
- Try at least one class that you wouldn't plan to try during your 4 years whether it be kickboxing or metaphysics in the philosophy department
- Try getting a summer job at USD, it is a really different type of experience”

Favorite Book:

Freakonomics - it is a wonderful way to discuss causation vs. correlation

Hobbies:

- Taking dogs (2 chow mix rescues) on walks/to the dog park
- Traveling to new cities to try new activities (Utah for sledding/dog sledding)
- Scuba diving
