  - University of California - San Diego #141
  - Villanova University #152
  - Marquette University #172
  - Seton Hall University #197
  - Emerson College #199
  - Gonzaga University #263

Data are from [College Factual](https://collegefactual.com). Their diversity rankings take into account four factors: the ethnic makeup of the student body, the geographic representation among students, and the gender makeup of the student body and the ages of the students. The schools with the most diversity when it comes to student ethnicity, geographic location (including international students), and gender come to the top of this ranking. The primary source of diversity information is enrollment data from the IPEDS "EFA" dataset. This is data reported by colleges to the Department of Education.

**U.S. NEWS & WORLD REPORT: CAMPUS ETHNIC DIVERSITY - NATIONAL UNIVERSITIES**  
 N=297, Five Number Summary: Min=.08, Q1=.37, Median=.51, Q3=.63, and Max =.75 Only a select number of institutional data shown.

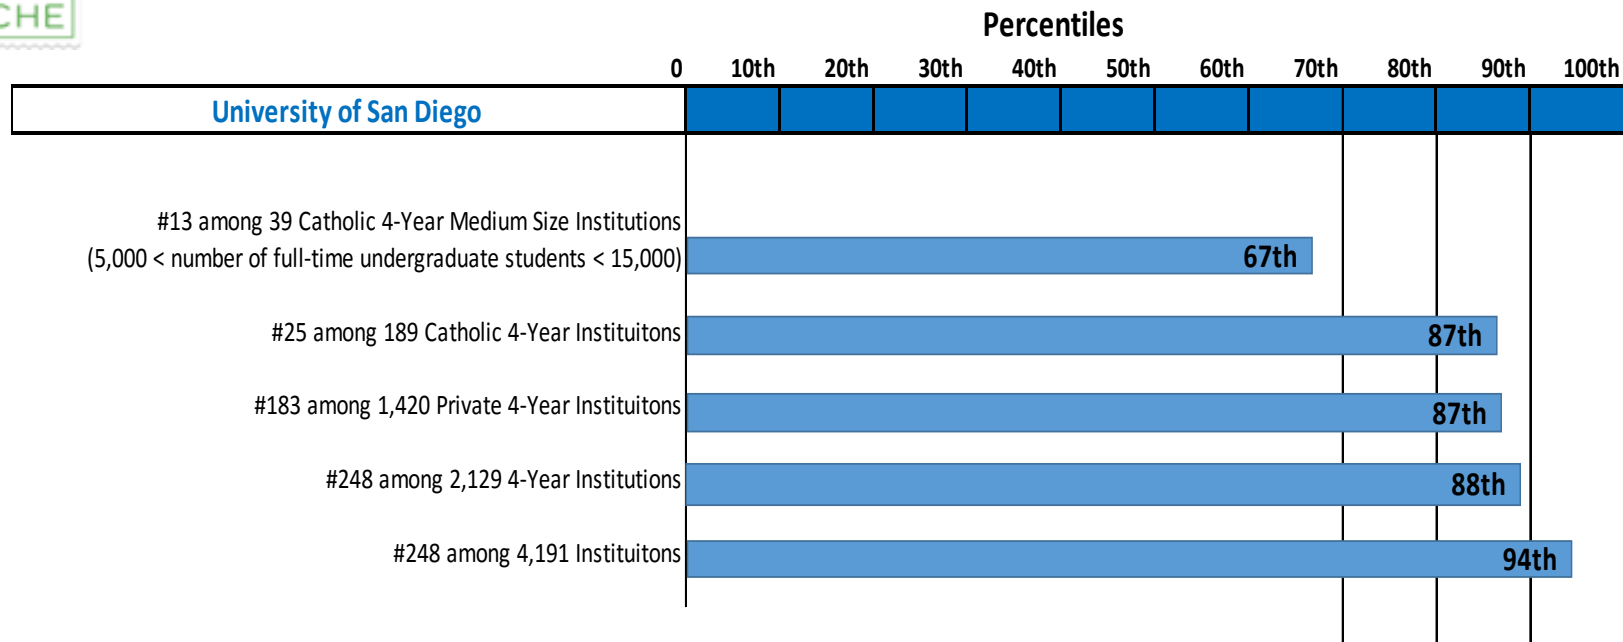

To identify colleges where students are most likely to encounter undergraduates from racial or ethnic groups different from their own, [U.S. News](#) factors in the total proportion of minority students, leaving out international students, and the overall mix of groups. The data are drawn from each institution's student body for the 2016-2017 school year. The categories used in the calculations are black or African-American, Hispanic, American Indian, Asian, Pacific Islander, white (non-Hispanic) and multiracial. Students who did not identify themselves as members of any of those demographic groups were classified as non-Hispanic whites for the purpose of these calculations. The formula produces a diversity index that ranges from 0 to 1. The closer a school's number is to 1, the more diverse the student population.
