

Reunion Class Gift: *Bringing USD School of Law Clinics Into the 21st Century*

The Class of 2014 aspires to raise at least **\$2,014** to help pay for the annual subscription costs of the new Legal Clinics Case Management System—[LegalServer](#). LegalServer is a web-based case management platform created for law school, nonprofit legal aid agencies, public defenders and city/county legal departments.

Case Management is a vital tool that makes it easier for students to gain hands-on experience. It provides students, staff attorneys, adjunct professors, and clinical directors with direct access to client files and documents at the touch of a finger. The Class of 2014 is focused on supporting students with the best hands on experience while also facilitating a greater impact in the community.

Thank you to the Class of 2014 for choosing to support this project that will bring USD's clinics into the modern era of case management.
