Waste Indicator
San Diego County Jurisdictions’ Change in Daily Waste Disposal per Capita

This map shows the San Diego County Jurisdictions change in daily waste disposal per capita. The percent change is measured in pounds and broken into five groups. The first group is more than a 10% decrease in daily waste disposal and only includes Imperial Beach. The next group with a 5-10% decrease includes Coronado, and National City. With a 0-5% decrease in daily waste disposal is Encinitas. The group with a 0-5% increase is the largest group that includes Oceanside, Vista, San Marcos, Carlsbad, Poway, Solana Beach, Del Mar, San Diego, El Cajon, La Mesa, Lemon Grove, and San Ysidro. The highest percent change in daily waste disposal of 5-10% includes Escondido, Santee, and Chula Vista.

Data Sources: California Department of Finance, E-4 population estimates, 2018; CalRecycle, Jurisdiction Disposal and ADC Tons by Facility, 2017

Three San Diego jurisdictions reduced waste disposal from 2016 to 2017, while 16 increased waste volumes. Santee had the largest waste increase per capita while Imperial Beach and National City had the largest decreases in their waste disposal per capita.
